

RUUD Inverter & Air Flow Basics

RSD is hosting a Ruud Inverter & Basic Air Flow training. The course will provide a better understanding of proper installation, service, and maintenance of Ruud's Mid Seer inverter equipment. It will also cover Air-Flow trouble shooting. We will discuss the basics of unit air flow diagnosis and perform hands on air flow measurements using some of the basic tools used to measure air flow. Technicians will walk away with a better understanding on how to measure static pressure and the ability to use the tools to take the measurements correctly.

SPACE IS LIMITED!

- Tuesday, April 16th, 2024
- 8:00am to 11:00am at the Kearney-San Diego branch
- Presented by Ryan Knight & Noah Aceves of RSD
- Continental breakfast and lunch will be provided
