

Belimo 101

RSD is hosting a 101 class on Belimo valves and actuators. This will give a better understanding of control types and which applications to use. Here you will learn about basic troubleshooting, select control signals, mount and wire both fail safe and non-fail safe actuators, sizing based on damper torque requirements, and the difference between fail safe and non-fail safe actuators. You will also learn the key differences on 2, 3, & 6-way valves, how to size a damper, and how to mount and wire spring and non-spring return actuators.

SPACE IS LIMITED!

- Thursday, April 18th, 2024
- 5:00pm to 7:00pm at the Kearney-San Diego branch
- Presented by Nicole Estrada of Belimo
- Dinner will be provided
- Cost: \$10 per person / No refunds for absentees
