

## Sub-Cooling & Superheat Saturation

This Testo program is for the HVAC professionals who want to learn more about the Pressure/Temperature Relationships in AC, Refrigeration systems, and how to correctly measure the performance of the system by looking at Superheat and Sub-Cooling. The course offers a better understanding of the refrigeration cycle, its components, and analog gauges vs. digital manifolds. It will provide a collection of knowledge in the Laws of Refrigeration and Heat Transfer.

**NATE CERTIFIED - 1.5 CEU**

- Wednesday, April 24th, 2024
- 8:00am to 10:00am at the Boise branch
- Presented by Gaspar Hernandez of Testo
- Breakfast will be provided
