

New Low GWP Refrigerants Regulations and the Future

With R22 in the rearview mirror, regulations are now focusing on Climate Change. This has put HFC and HFO refrigerants on the clock and has seen the introduction of new rules and regulations that will have a significant impact on new equipment, and existing system retrofits. This presentation will address where we are, what new rules are on the horizon, and how these will change our industry forever.

- Wednesday, April 24th, 2024
- 8:00am to 10:00am at the Tucson training center
- 2055 E 19th St., Tucson, AZ
- Presented by Thomas Gaili
